

Now Hiring

Senior M&E Engineer

Responsible for the execution of mechanical & electrical designs involving the preparation of calculations and review of design drawings in accordance to customer specifications, applicable codes, standards and other generally accepted practices. As a Senior Engineer you will lead a team of Engineers and support the Director of the department with projects in the pipeline.

Responsibilities

- Undertake detailed design of mechanical and electrical works
- Project coordination including submission to local authorities and liaison during the construction stage
- Liaise with clients, consultant, and authorities on technical matters
- Train and support junior engineers

Requirements

- Degree in Mechanical or Electrical Engineering recognized by the PEB
- At least 3 years of experience in M&E Engineering
- Conversant in design codes and authority requirements
- Able to meet tight timelines and handle stress
- Able to work independently and with a group of engineers

If you feel like you meet the above requirements and would to take on the challenge, please email us your CV and cover letter to hr_eqr@ecas.com.sg.
We are afraid only shortlisted candidates will be contacted.
