Senior Traffic Engineer

ECAS is looking for a Senior Traffic Engineer who can lead traffic engineering projects. The candidate should have an extensive network in Singapore and a strong track record in Singapore or other countries. The Senior Traffic Engineer will be in charge of promoting the service to potential clients and tender for projects.

Responsibilities

- Conduct traffic impact assessments for local projects
- Design of temporary traffic diversion to facilitate construction works
- Coordination between ECAS and clients regarding traffic related works
- Assist in developing the specifications and tender documents, cost estimates and other materials for tenders and tender evaluation.

Requirements

- Degree in Civil Engineering or transportation
- At least 5 years of experience in Traffic Engineering
- Knowledge of transport modelling software (Sidra, VISUM, etc.)
- Able to meet tight timelines and handle stress
- Able to work independently and with a group of engineers

If you feel like you meet the above requirements and would to take on the challenge, please email us your CV and cover letter to hr_egr@ecas.com.sg.
We are afraid only shortlisted candidates will be contacted.

ECAS offers civil, structural, geotechnical, mechanical, and environmental engineering services to clients of the public and private sector in Singapore. Drawing on our 20 years of experience, we provide design consultancy, accredited checking, construction management, and project management services with expertise in rail, bridges, tunnels, and building works.
