Director: Tay Thiam Yeow, Titus

Director: Dr. Shen Wei Yue

Director: Leong Boon Cheng

Director: Cecil Chua

Director: Liu Yu Jun

Associate Director: Yu Yong Hua

Associate Director: Ong Chia Wai

SERVICES

Design Consulting

We conduct economic and technical feasibility studies to understand the impact of the project and propose the best solution to the client. We look at the project not as an independent property but as a small piece in a bigger puzzle. We have vast experience in planning and designing of roads, road tunnels, viaducts, MRT Tunnels and MRT stations and all types of buildings.

Construction Supervision

Our professionals offer on-site supervision of the complete project to comply with industry standards. We make sure that what was designed is developed keeping in mind cost-effective solutions to benefit the client. We have vast experience in managing and constructing road tunnels (open cut or mined tunnel), viaducts, MRT stations and MRT tunnels and all types of buildings. We have the capability of supervising precise surveys and control alignments. We, through out construction supervision experience, have good architectural knowledge and relevant experiences in procurements, programming, site coordination and installation of architectural works.

Project Management

We offer project management consulting services to a wide range of engineering and construction activities. On behalf of our client, we ensure that critical tasks and goals are met accordingly.

Accredited Checking

We independently check the designs of the works to assure the constructability of the project and ensure that all structures are complaint with the standards of our region.

Assessment and Inspection

Periodical Inspections for buildings, roads and rail structures, as required by the Building and Construction Authority (BCA) are performed by our qualified structural engineers.

Design for Safety (Dfs)

We assist our clients to address and identify means to mitigate the risks inherent in the design of a construction project so as to reduce the safety and health risks during the construction, maintenance or repair phase, and demolition the building and structure.

Building Information Modelling (BIM)

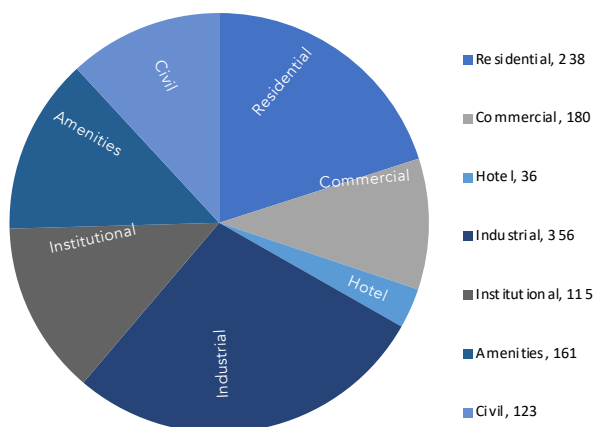

We offer pre-construction solutions for the creation and management of intelligent models leading to the design, construction and operation of various facilities.

Steel and Rebar

We develop shop drawings and erection drawings for steel pieces for fabricators and contractors.
